

Statement Regarding Upcoming Transition from UnumProvident to Standard:

“Some of you may have already read or received information that CTA is changing the life and income protection carrier from UnumProvident to Standard Insurance Company (The Standard) in the fall. Some of the communications indicated that some districts are requiring staff to re-enroll or fill out a new payroll authorization forms. BHUSD is not requiring this re-enrollment. (I have spoken with a Standard representative and we should be coded in their system as not requiring this, so if you contact them, they should know this.) Your coverage will transfer as a group to The Standard. We have been assured that there will be no premium increase for the next three years, however, there are salary step increases that may increase premiums for individuals, and age related individual increases for life insurance. I anticipate that I will be receiving additional information from the new company, including contact information for members, during the summer. As I receive information, I will forward it to you.”
